Room Layout

STAIRS

DOOR

WINDOW

Shelf Surface Options

High Pressure Laminated panel with the front edge protected with a continuous piece of 3/4" x 3/4" x 1/8" extruded aluminum angle.

IRONCOAT surfacing is a polyurethane and polyurea coating that is applied to the front edge and the working surface.

Things to consider when planning a music storage room

- Receive a complete inventory of instruments to be stored. Some items are left out (pianos, harps, kettle drums etc...)
 - Look at the overall location of the storage room to plan for delivery.
 - If up stairs, will cabinets fit in the elevator or will the stairwell be wide enough?
 - The room may seem large, but check the depth of the cabinets facing each other and verify there is room to open both cabinets.
 - Check the weight and size of each cabinet, number of installers and equipment required for the installation.
 - These cabinets arrive assembled.
- Check:
- Exterior and interior door sizes
 - Hallway width
 - Hallway corners & doors
 - Ceiling heights
 - Location of sprinkler heads
 - Location of security system sensors
 - Electrical outlets and light switches

501-8-G

505-13-G

514-3-G

As the conductor, you can now take charge of how the instruments are stored both before and after the performance. Our fully assembled units are available with three choices of doors or no doors at all. Ironwood's storage flexibility along with our wide range of colors will help set the tone for your symphony environment.

Open Door

Open units provide the compartmental storage you need and are ideal when used in a secured room.

Solid Door

Solid melamine doors provide an economic option when choosing from our standard colors. Our high pressure laminate (HPL) doors allow for virtually unlimited color options from all the major laminate suppliers. These doors provide full security when locked with the individual lock hasp.

Grill Door

Grill doors provide the security you need while allowing you to see which instruments have been taken home. The grill doors also provides for better ventilation. These doors also have individual lock hasps to allow the students access to only their instrument.
